Art 75

3 Contemporary Artists

I chose Cory Arcangel, Takashi Murakami, and Damien Hirst. These artists use a lot of bright, vibrant and colorful artwork. They are famously known for their different media in art. Cory Arcangel is a media artist who works with digital tech designing. He makes software that is usable for other purposes in his art. Takashi Murakami is a Japanese artist in the fine arts and commercial. His work is very vibrant. He is known for making sculpture, paintings and films that include abstract objects and figures. Damien Hirst is a very famous and wealthy artist in the UK. He explores the complex relationships between art, religion, science, life and death. He is an art collector and has a passion for it. These three artists have similar tastes in the wide variety in contemporary art popularly known for their abstract and unique forms of colors and shapes.
